MAC TeamBoard Driver Installation

The MAC TeamBoard Driver can be downloaded from the Technology Core website.

http://www.technologycore.com.au/support_drivers

Once you have downloaded the TeamBoard Driver successfully, you can then proceed to run the .dmg file by double clicking teamboard.dmg. When the TeamBoard disk image is 'mounted' double-click the icon to open. To continue with the installation, double click the file TeamBoard.pkg file and follow the prompts.

MAC TeamBoard Driver Uninstall

TeamBoard Suite 5.5 or earlier

To uninstall the TeamBoard Driver, you need to be logged into the MAC as a Root Administrator. Go to the Spotlight search function and type in tbupddmx. In the results, you will see a Folder of that name (tbupddmx). Click the Folder to open it. Scroll down until you see an application called uninstall. Double click the uninstall application, the Uninstall window will open and then click the Uninstall icon in the bottom right side of the window. The uninstall process will begin.

If you are in the Queensland region refer back to the nominated MOE Orange Card holder.

TeamBoard Suite 6.0.1 or higher

To uninstall the TeamBoard Driver, you need to be logged into the MAC as a Root Administrator. Go to Applications, open Utilities, double click Uninstall TeamBoard and follow the prompts.
