Available sizes: 49", 65"

# High Impact Resistance
Indoor LED Display Panel

ProLux LED displays are engineered with impact-resistant trim to endure the demands of indoor sports. With 43% smaller pixels, they offer sharper image quality and exceptional durability.

Secure Metal Modules
Ensures a compact fit that prevents loosening and maintains stability under regular impact.

Impact-Resistant Trim
Provides a polished appearance while shielding LED module edges from impacts.

Impact-Resistant Trim
Prevents impact forces from reaching electronic components, and reducing damage risk.

ABOUT US

Operating since 1987, Technology Core have been at the leading-edge of design, manufacture, and distribution of Australian interactive presentation solutions. Our products and solutions have been adopted by thousands of organisations across the nation and we are a preferred supplier with a number of Australian Government contracts.

100% Australian owned and operated, we offer all services including installation, training, and support for all our products.

Training and Support

We have developed **training sessions** that show you **how to get the best from our products** using software and hardware you already use. This means whatever platform you use including Microsoft, Apple and Google, or even bespoke applications, you will learn **how to adopt HDi into your workflows.**

Training sessions are offered in person or via video conference to share the best practical tips and exciting new methods to get the most out of the technology.

#Learning with HDi
