## High Impact Resistance

Indoor LED Display Panel

ProLux LED displays are engineered with impact-resistant trim to endure the demands of indoor sports. With 43% smaller pixels, they offer sharper image quality and exceptional durability.

### Secure Metal Modules

Ensures a compact fit that prevents loosening and maintains stability under regular impact.

### Impact-Resistant Trim

Provides a polished appearance while shielding LED module edges from impacts.

### Impact-Resistant Trim

Prevents impact forces from reaching electronic components, and reducing damage risk.

# ABOUT US

Operating since 1987, Technology Core is a proudly Australian owned and operated company specialising in Interactive, Wireless, and Audiovisual Solutions. With offices in three states and a nationwide reseller network, we serve customers across the Education, Government, and Corporate sectors throughout Australia.

Our commitment to understanding customer needs has enabled us to become an approved supplier for several Australian government contracts.
