

WHO WE ARE

Technology Core brings decades of engineering and AV expertise together to create interactive solutions that simply work. Our team has spent more than 40 years designing, building and supporting technology for education, government and corporate environments. With deep technical capability and a strong focus on usability, we deliver Australian developed products that are reliable, intuitive and built for real world impact.

Our focus is simple: to create solutions that feel effortless which are shaped by how people actually use technology, while maximising productivity. By pairing our passion for smart design with a strong understanding of customer needs, we deliver solutions that are reliable and ready for everyday use.

OUR PEOPLE

Technology Core's success is driven by the expertise and dedication of our people. The company's founder has been part of the industry since 1987 and brings extensive experience in AV Integration, engineering, electronics, electrical systems and product development. The business has been built by selecting specialists across every discipline required to support advanced audio visual and interactive technologies.

Today, our team includes experts across customer experience, product suitability, technical diagnostics, service, support, installation, marketing and sales. Each member contributes essential knowledge that ensures our solutions are practical, reliable and tailored to real world environments.

This purposeful combination of technical capability and customer focused roles enables us to deliver solutions that not only perform at a high level, but genuinely support the people who rely on them.

OUR APPROACH

At Technology Core, our focus is grounded in simplicity, clarity, and consistency. We take the time to understand each environment, select the most suitable technology, and deliver solutions with precision and care.

Our focus is centred on four key principles:

Usability: Technology designed to integrate seamlessly into everyday workflows, ensuring intuitive and effective use.

Reliability: Systems that are stable, predictable, and easy to rely on in everyday environments, from classrooms to meeting spaces.

Support: Prompt and informed assistance provided by a team with comprehensive expertise and knowledge of our technology.

Continuous Improvement: Ongoing refinement of our solutions and processes to remain current and deliver consistent outcomes.

This approach enables us to deliver solutions that not only meet immediate needs but continue to provide value over time. As a result, Technology Core is recognised as a trusted and dependable provider, consistently delivering high-quality solutions across the markets we serve.

WHAT WE DO

We design, deliver and support interactive and audiovisual technology solutions, built for real-world environments and everyday use. Our expertise combines practical engineering, thoughtful design and dependable service to ensure every solution is intuitive, reliable and ready to perform.

OUR CAPABILITIES

Sales & Custom Solutions

Our experienced team delivers tailored AV solutions designed around each environment, combining the right technologies to meet the unique needs of every project.

Integration, Delivery & Installation

We manage the full implementation process, including delivery, installation and system setup, ensuring everything works seamlessly from day one.

Proudly Australian

We supply Australian-designed interactive technology and accessories, built for performance, usability and long-term reliability.

Support & Training

We provide comprehensive training and ongoing support to ensure users feel confident in our products, ensuring continued value and performance long term.

We have delivered thousands of interactive screens and AV installations across education, government and corporate environments, with a strong understanding of how technology is used in everyday settings.

This experience, combined with hands-on capability, enables us to develop innovative solutions, many designed locally in Australia, with a clear focus on usability and the customer needs.

CUSTOM AV & TECHNOLOGY SOLUTIONS

Every environment has different requirements. Our solutions are developed around how each space is used, ensuring technology is integrated seamlessly to support communication, collaboration and everyday workflows.

Tailored AV Systems

Purpose-built solutions for meeting rooms, classrooms, training spaces and large environments, designed around real use.

Seamless Integration

Systems that connect with existing platforms including video conferencing, control systems and workplace technology.

Interactive & Collaborative Environments

Solutions that support modern ways of working, including hybrid collaboration and shared digital experiences.

End-to-End Implementation

From planning through to delivery, installation and system setup, ensuring everything works from day one.

AUSTRALIAN DESIGNED PRODUCTS

Our HDi products are designed right here in Australia, shaped by what customers tell us they want and what they actually need. With a dedicated in-house engineering and design team, we create solutions built specifically for the Australian market.

Australian Innovation & Design

Our Australian-based R&D, engineering and design teams work together to develop new technologies, create intuitive interfaces and design purpose-built mounting and mobility solutions for the HDi range.

Expert Local Manufacturing

Our HDi mobility solutions are proudly manufactured in Australia by experienced specialists, ensuring premium quality, reliability and consistency across our entire product range.

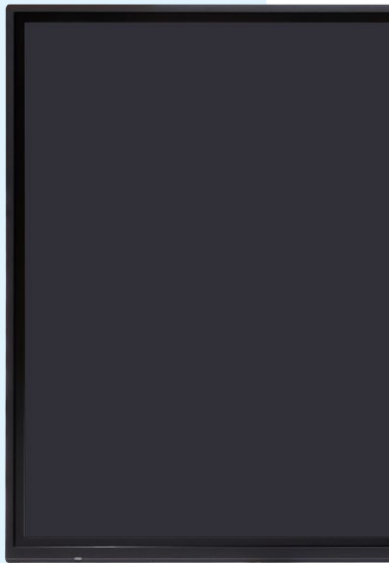

Supporting Australian Industry

We prioritise high-quality, locally sourced materials to strengthen Australian industry partnerships, reduce lead times and ensure faster delivery to customers nationwide.

OUR RANGE OF PRODUCTS & INTERACTIVE SOLUTIONS

Technology Core provide a complete ecosystem of interactive screens, wireless presentation solutions, and ergonomic accessories. From high-performance panels to plug-and-play connectivity and flexible mounting options, our products work together to create efficient, user-friendly learning and collaboration spaces.

INDUSTRIES POWERED BY OUR PRODUCTS

Technology Core delivers reliable, easy-to-use AV and interactive solutions across a range of industries, designed to support real-world environments and everyday use.

Education & Government Services

We support education and government environments with solutions that enhance learning, communication and collaboration, from early learning through to universities and public sector settings.

Corporate & Commercial

We deliver technology for workplaces, meeting spaces and large-scale environments, improving communication, presentations and collaboration across corporate and commercial settings.

Industrial & Logistics

We provide solutions for industrial and logistics environments, supporting operations, training and communication in demanding conditions.

TRAINING & SUPPORT

At Technology Core, our training begins after the screen is installed. We focus on helping customers confidently use their technology in practical scenarios, tailored to their specific environment. Whether in education or business, our approach ensures users understand not just how the technology works, but how to apply it effectively in their day-to-day activities.

HOW WE SUPPORT OUR CUSTOMERS

01

Post-Installation Training

We provide hands-on guidance once the technology is in place, ensuring users are set up for success from day one.

02

Personalised Training

Tailored to how each customer operates, focusing on practical use cases relevant to their environment.

03

Ongoing Learning Resources

Access to videos, articles, and materials that reinforce training and support continuous learning.

04

Continuous Support

We remain available beyond initial training to assist, refine usage, and maximise long-term value.

SUSTAINABLE IMPACT & GLOBAL EDUCATION

At Technology Core, we are committed to making a positive impact on the environment.

Through our refurbished screen initiative, we give interactive screens a second life — making modern technology more accessible to schools and organisations.

Returned, ex-demo, and superseded screens are restored to a near-new standard using repaired or upgraded components, extending their usable life.

This provides a cost-effective way to access interactive technology without compromising on quality or reliability.

150+

Schools and businesses have adopted our refurbished interactive screens

THE REPURPOSING PROJECT IN CAMBODIA

Technology Core and the Australian Collaboration Cambodia (ACC) charity group have been working together to supply new and refurbished HDi interactive screens and laptops to schools and universities in Cambodia.

The project aims to extend the life of existing technology while opening up access to new solutions for students nationwide.

Each year a Technology Core representative along with an ACC member travel to Cambodia to **provide Teachers and students with valuable training.**

Professional Training Support

Structured training is delivered on-site during installation, with ongoing virtual sessions provided throughout the year.

This ensures educators feel confident and supported as they integrate the technology into their classrooms.

Expanding Access to Technology

This initiative is focused on extending access to meaningful learning technology, enabling more children to benefit from modern digital tools.

We also welcome donations of laptops, iPads, desktop computers & other AV equipment in good working order, which will be donated to the many schools supported by the ACC.

OUR VALUES

Our values shape how we work, how we collaborate, and how we deliver for our customers. They guide our decisions, define our culture, and ensure consistency in everything we do.

Teamwork

We work together as one team and support each other to deliver the best outcomes for our customers. Every contribution matters.

Quality & Efficiency

We take pride in our work and aim to get things right the first time. Reliability, practicality and long term performance guide every decision.

Professionalism, Fairness & Respect

We communicate openly, act with integrity and treat customers, partners and colleagues with fairness and respect.

Customer Satisfaction

We listen, adapt and remain committed to delivering solutions that genuinely work. We continue to grow long term customer relationships built on trust and consistency which are important to us.

WHY CHOOSE TECHNOLOGY CORE

We bring together local knowledge, technical expertise and a customer-first mindset to deliver reliable, well-supported solutions designed for real-world environments.

- ✓ Extensive industry experience supported by strong, hands-on technical expertise
- ✓ Australian-developed solutions, purpose-built for local environments
- ✓ National presence with local offices and warehousing capabilities
- ✓ Responsive, practical support from specialists who understand your environment
- ✓ Engineering-led approach focused on quality, reliability, and seamless integration
- ✓ Customer-centric mindset grounded in transparency and accountability
- ✓ Simplifying complex technology to ensure ease of use and long-term value
